CSS Cheat sheet

Structure

```
selector {
    property : value ;
    property : value ; }
```

Linking to stylesheet:

```
<link rel="stylesheet" href="styles.css">
```

CSS properties

CSS property	Value example
background-color	green; red; blue; black; yellow; white; LightBlue; LightCoral; LightGreen; LightPink; LightGrey; https://www.w3schools.com/cssref/css_colors.asp
color	(as above)
text-align	left; right; center;
font-family	Arial; Helvetica; 'Times New Roman'; Verdana; https://www.w3schools.com/cssref/css_websafe_fonts.asp
font-size	20px;

Example CSS:

```
    *       {                                    (← '*' means all elements)
            font-family : Verdana;}
        body {
            background-color : lightblue;}
        h1  {
            background-color : green;
```

```
                    text-align : center;}
        p   {
                    background-color : yellow;
                    color : blue;}
```

Styling images

CSS property	Value example (pixels)
height	100px;
width	100px;
margin (the space outside the box; this affects all margins – if you want specific ones, choose margin-top, margin-bottom, margin-left, margin-right instead)	10px;
padding (the space inside the box)	10px;
border https://www.w3schools.com/css/css_border.asp	1px solid black;

Example CSS referencing a class:

HTML

```
<div class="intro">
  <h2>Welcome</h2>
  <p>Welcome to the homepage of my website</p>
</div>
```

CSS

```
        .intro {
                background-color : lightgreen;
                text-align : center;
                margin : 5px;
                padding : 20px;}
```
